(Continue from Part 1.)

Major pathology journal article titles, December 2011, Part 2.

**International Journal of Clinical and Experimental Pathology. Volume 4, Issue 8.**

*P-733.* Clinicopathologic significance of putative stem cell markers, CD44 and nestin, in gastric adenocarcinoma.  
*P-742.* beta-catenin expression in benign and malignant pleural disorders.  
*P-748.* Evaluation of a high avidity anti-dsDNA IgG enzyme-linked immunosorbent assay for the diagnosis of systemic lupus erythematosus.  
*P-755.* Immunohistochemical expressions of fatty acid synthase and phosphorylated c-Met in thyroid carcinomas of follicular origin.  
*P-765.* EPO improves the proliferation and inhibits apoptosis of trophoblast and decidual stromal cells through activating STAT-5 and inactivating p38 signal in human early pregnancy.  
*P-775.* C-kit expression in human osteosarcoma and in vitro assays.  
*P-782.* Intravascular large B-cell lymphoma: report of three cases and analysis of the mTOR pathway.  
*P-791.* Angiosarcoma of the mandibular gingiva.  
*P-794.* Papillary squamous cell carcinoma of the oral cavity with acantholytic and pseudovascular features.  
*P-797.* Well differentiated adenocarcinoma of the stomach composed of chief cell-like cells and parietal cells (Gastric adenocarcinoma of fundic gland type).  
*P-799.* Primary diffuse large B-cell lymphoma of the ethmoid sinus.

**International Journal of Gynecological Pathology. Volume 30.**

There is no December issue.

**International Journal of Surgical Pathology. Volume 19.**

Issue is not available till the end of the month.

**Journal of Clinical Pathology. Volume 64, Issue 12.**

*P-1039.* Valve pathology: a dying trade.  
*P-1042.* The pathogenesis, diagnosis, investigation and management of osteoporosis.  
*P-1051.* Silencing of the hPOT1 gene by RNA interference promotes apoptosis and inhibits proliferation and aggressive phenotype of gastric cancer cells, likely through up-regulating PinX1 expression.  
*P-1058.* Immunohistochemical expression of keratan sulfate: a possible diagnostic marker for carcinomas of the female genital tract.  
*P-1064.* Abnormal spiral artery remodelling in the decidual segment during pregnancy: from histology to clinical correlation.  
*P-1069.* HER2 gene amplification in patients with breast cancer with equivocal IHC results.  
*P-1073.* Lymph node distribution and pattern of metastases in the mesorectum following total mesorectal excision using the modified fat clearing technique.  
*P-1078.* MMP-2 and MMP-9 in lymph-node-positive bladder cancer.  
*P-1083.* Human papillomavirus coinfection in the oral cavity of HIV-infected children.
P-1088. Sarcomatoid renal cell carcinoma is an example of epithelial–mesenchymal transition.
P-1097. Dual-colour HER2/chromosome 17 chromogenic in situ hybridisation enables accurate assessment of HER2 genomic status in ovarian tumours.
P-1108. Assessment of proliferation markers in metastatic melanoma in sentinel lymph nodes.
P-1112. HER2 genetic heterogeneity in breast carcinoma.
P-1117. Endoscopic ultrasound guided transbronchial fine needle aspiration: a French Department of Pathology's 4-year experience.
P-1123. Performance of the Iris iQ(R)200 Elite analyser in the cell counting of serous effusion fluids and cerebrospinal drainage fluids.
P-1132. Sporadic Burkitt lymphoma in southern China: 12 years' experience in a single institution in Guangzhou.
P-1139. Multicentric evaluation of a second generation assay to detect antiviral citrullinated peptide antibodies: a collaborative study by the Forum Interdisciplinare per la Ricerca nelle Malattie Autoimmuni.
P-1142. The prognostic benefits of routine staining with elastica to increase detection of venous invasion in colorectal cancer specimens.
P-1142. Can reporting of cardiac valves be rationalised? Our experience of improving efficiency.

P-1545. Pathological definition and clinical significance of vascular invasion in thyroid carcinomas of follicular epithelial derivation.
P-1553. Morphoproteomics demonstrates activation of mammalian target of rapamycin pathway in papillary thyroid carcinomas with nuclear translocation of MTOR in aggressive histological variants.
P-1560. Angiomatoid fibrous histiocytoma: unusual sites and unusual morphology.
P-1571. KRAS mutant allele-specific imbalance in lung adenocarcinoma.
P-1586. Gray zone lymphoma: chromosomal aberrations with immunophenotypic and clinical correlations.
P-1606. Pediatric B-lymphoblastic leukemia with RUNX1 amplification: clinicopathologic study of eight cases.
P-1612. Tumor-infiltrating neutrophils in pancreatic neoplasia.
P-1620. Pancreatic-type acinar cell carcinoma of the liver: a clinicopathologic study of four patients.
P-1627. CD10 immunohistochemistry stains enteric mucosa, but negative staining is unreliable in the setting of active enteritis.
P-1633. Pleuroparenchymal fibroelastosis in patients with pulmonary disease secondary to bone marrow transplantation.

P-717. A clinicopathological and immunohistological re-evaluation of adenosquamous carcinoma of the lung.
P-723. Immunohistochemical, molecular, and clinicopathological analyses of urothelial carcinoma, micropapillary variant.
P-731. Clinicopathological significance of invasive micropapillary carcinoma component in invasive breast carcinoma.
P-737. Nodal follicular lymphoma without complete follicular dendritic cell networks is related to localized clinical stage.
P-742. Germinal center B-cell-like diffuse large B-cell lymphoma of the duodenum is associated with t(14;18) translocation.
P-749. Stinging in the oral cavity caused by ingestion of the sperm bags of a squid: A case report.
P-756. Mucin-positive epithelial mesothelioma of the peritoneum: Small bowel involvement.
P-762. Sinonasal teratocarcinosarcoma with rhabdoid features.
P-768. Sclerosing variant of perivascular epithelioid cell tumor in the female genital organs.
P-773. Intraductal papillary neoplasm arising from peribiliary glands connecting with the inferior branch of the bile duct of the anterior segment of the liver.
P-778. Intrarenal ectopic adrenal tissue associated with renal angiomyolipoma.

Seminars in Diagnostic Pathology. Volume 29.
There is no December issue.

P-1759. Fallopian tube correlates of ovarian serous borderline tumors.
P-1766. Diagnosis of serous tubal intraepithelial carcinoma based on morphologic and immunohistochemical features: a reproducibility study.
P-1776. Prevalence of uterine and adnexal involvement in pulmonary lymphangioleiomyomatosis: a clinicopathologic study of 10 patients.
P-1786. Calretinin staining facilitates differentiation of olfactory neuroblastoma from other small round blue cell tumors in the sinonasal tract.
P-1806. Absence of Merkel cell polyomavirus in primary parotid high-grade neuroendocrine carcinomas regardless of cytokeratin 20 immunophenotype.
P-1812. Somatic mutations in PIK3CA and activation of AKT in intraductal tubulopapillary neoplasms of the pancreas.
P-1818. Colonic mucosubmucosal elongated polyp: a clinicopathologic study of 13 cases and review of the literature.
P-1823. The fake fat phenomenon in organizing pleuritis: a source of confusion with desmoplastic malignant mesotheliomas.
P-1830. Determining the site of origin of mucinous adenocarcinoma: an immunohistochemical study of 175 cases.
P-1837. PAX2 and PAX8 expression in primary and metastatic mullerian epithelial tumors: a comprehensive comparison.
P-1848. Claudin-5 as an immunohistochemical marker for angiosarcoma and hemangiendotheliomas.
P-1857. gamma-Synuclein is a promising new marker for staining reactive follicular dendritic cells, follicular dendritic cell sarcoma, Kaposi sarcoma, and benign and malignant vascular tumors.
P-1866. Poorly differentiated thyroid carcinomas: how much poorly differentiated is needed?
P-1873. The dilated distal esophagus: a new entity that is the pathologic basis of early gastroesophageal reflux disease.
P-1906. Pax8 detection in well-differentiated pancreatic endocrine tumors: how reliable is it?

P-475. Mutant p53 gain of function is interwoven into the hallmarks of cancer.
P-490. CTGF/CCN-2 over-expression can directly induce features of skeletal muscle dystrophy.
P-512. Paradoxical effects of T-cadherin on squamous cell carcinoma: up- and down-regulation increase xenograft growth by distinct mechanisms.
P-525. Zic2 synergistically enhances Hedgehog signalling through nuclear retention of Gli1 in cervical cancer cells.
P-535. Genetic polymorphisms in AURKA and BRCA1 are associated with breast cancer susceptibility in a Chinese Han population.
P-544. Role of miR-150-targeting c-Myb in colonic epithelial disruption during dextran sulphate sodium-induced murine experimental colitis and human ulcerative colitis.
P-554. Specific and extensive endometrial deregulation is present before conception in IVF/ICSI repeated implantation failures (IF) or recurrent miscarriages.
P-565. Human primary ductal carcinoma in situ (DCIS) subtype-specific pathology is preserved in a mouse intraductal (MIND) xenograft model.
P-574. Increased midkine expression correlates with desmoid tumour recurrence: a potential biomarker and therapeutic target.
P-583. NADPH oxidase inhibition ameliorates Trypanosoma cruzi-induced myocarditis during Chagas disease.
P-597. Sphingosine-1-phosphate signalling induces the production of Lcn-2 by macrophages to promote kidney regeneration.
P-609. MiR-17/106b seed family regulates p21 in Hodgkin's lymphoma.
P-618. Acute respiratory distress syndrome leads to reduced ratio of ACE/ACE2 activities and is prevented by angiotensin-(1-7) or an angiotensin II receptor antagonist.

P-565. Frequency and clinical significance of placental histological lesions in an unselected population at or near term.
P-573. Clinicopathologic features of advanced gallbladder cancer associated with adenomyomatosis.
P-581. Cyclooxygenase-2 expression in esophageal epithelium before and after photodynamic therapy for Barrett's esophagus with high-grade dysplasia or intramucosal carcinoma.
P-587. Prognostic significance of Tiam1 expression in papillary thyroid carcinoma.
P-595. Intratumoural lymph vessel density is related to presence of lymph node metastases and separates encapsulated from infiltrative papillary thyroid carcinoma.
P-607. Typing of renal tumors by morphological and immunocytochemical evaluation of fine needle aspirates.
P-615. TLE1 is expressed in the majority of primary pleuropulmonary synovial sarcomas.
P-623. Pancreatic adenocarcinoma with multiple eosinophilic extracellular deposits consistent with noncalcified psammoma bodies.
