Major pathology journal article titles, April 2012, Part 1.

Advances in Anatomic Pathology. Volume 19.

There is no April issue.

P-79. Histology and distribution of prostatic tissue on prostatic urethral margins: evaluation of radical prostatectomy specimens and implications on frozen section analysis.
P-85. Aggressive meningiomas involving the parotid gland.
P-91. Is p16 immunohistochemistry a more cost-effective method for identification of human papilloma virus-associated head and neck squamous cell carcinoma?
P-100. Deceiving high-grade cervical dysplasias identified as human papillomavirus non-16 and non-18 types by Invader human papillomavirus assays.
P-119. Dentigerous cyst of inflammatory origin-a diagnostic dilemma.
P-128. Comparison of clarity of nucleocytoplasmic differentiation of oral tissues processed by microwave and conventional methods.
P-134. A case of clear cell variant of solid-pseudopapillary tumor of the pancreas in an adult male patient.
P-141. Schwannoma arising from the sublingual gland.
P-145. Urothelial metaplasia of the seminal vesicles: a report of 2 cases.
P-152. Simultaneous hepatocyte paraffin-1-positive alpha-fetoprotein-producing gastric adenocarcinoma and gastric mucosal-associated lymphoid tissue.
P-158. Pathologic complete response to neoadjuvant therapy in patients with pancreatic ductal adenocarcinoma means no residual tumor: no need to assess "viability".

There is no April issue.

P-342. Correction.
P-352. Butterfly needles reduce the incidence of nerve injury during phlebotomy.
P-353. Diagnosis of leishmania.
P-354. "No pay, no play": game over.
P-356. Introduction to continuing special series.
P-357. Genitourinary tumor pathology: introductory comments.
P-360. Selected common diagnostic problems in urologic pathology: perspectives from a
large consult service in genitourinary pathology.
P-372. Emerging critical role of molecular testing in diagnostic genitourinary pathology.
P-391. Renal cell carcinoma with clear cell and papillary features.
P-400. Spectrum of preneoplastic and neoplastic cystic lesions of the kidney.
P-410. Role of immunohistochemistry in diagnosing renal neoplasms: when is it really useful?
P-418. Intraductal carcinoma of the prostate.
P-426. Implications of the international society of urological pathology modified Gleason grading system.
P-435. Difficult differential diagnoses in testicular pathology.
P-447. Trends in pancreatic pathology practice before and after implementation of endoscopic ultrasound-guided fine-needle aspiration: an example of disruptive innovation effect?
P-454. Primary cardiac synovial sarcoma.

P-139. Surface tumours of bone.
P-149. Fibro-osseous lesions of the head and neck.
P-159. Synovial fluid analysis in the diagnosis of joint disease.
P-169. The pathology of joint replacement and tissue engineering.
P-177. Li-Fraumeni syndrome: a role for surgical pathologists?
P-185. Suppurative and granulomatous dermatitis with pseudocysts: a useful tissue reaction pattern.

P-34. Human telomerase RNA component (hTERC) gene amplification detected by FISH in precancerous lesions and carcinoma of the larynx.
P-35. Validation of diagnostic accuracy using digital slides in routine histopathology.
P-38. Case report: a unique pediatric case of a primary CD8 expressing ALK-1 positive anaplastic large cell lymphoma of skeletal muscle.
P-39. Sporadic haemangioblastoma of the kidney with rhabdoid features and focal CD10 expression: report of a case and literature review.
P-40. Genomic amplification patterns of human telomerase RNA gene and C-MYC in liquid-based cytological specimens used for the detection of high-grade cervical intraepithelial neoplasia.
P-41. Clinicopathological significance of SOX4 expression in primary gallbladder carcinoma.
P-42. Quantitative comparison of immunohistochemical staining measured by digital image analysis versus pathologist visual scoring.
P-43. A rare case of malignant triton tumor in the cerebellopontine angle.
P-44. Expression features of SOX9 associate with tumor progression and poor prognosis of hepatocellular carcinoma.
P-45. Serum peptidome patterns of breast cancer based on magnetic bead separation and
mass spectrometry analysis.

P-46. Is there a link between diabetic glomerular injury and crescent formation? A case report and literature review.
P-47. Epididymis rhabdomyoma: A case report and literature review.

P-679. Prognostic tissue markers in melanoma.
P-690. Pitfalls in the evaluation of melanocytic lesions.
P-706. Fluorescence in-situ hybridization analysis for melanoma diagnosis.
P-715. Non-melanocytic mimics of melanocytic neoplasms.
P-731. Differential expression of forkhead box M1 and its downstream cyclin-dependent kinase inhibitors p27(kip1) and p21(waf1/cip1) in the diagnosis of pulmonary neuroendocrine tumours.
P-740. Expression of vascular Notch ligands Delta-like 4 and Jagged-1 in glioblastoma.
P-748. An analysis of five clear cell papillary cystadenomas of mesosalpinx and broad ligament: four associated with von Hippel-Lindau disease and one aggressive sporadic type.
P-758. ImmunoMembrane: a publicly available web application for digital image analysis of HER2 immunohistochemistry.
P-768. Improved clonality detection in Hodgkin lymphoma using the BIOMED-2-based heavy and kappa chain assay: a paraffin-embedded tissue study.
P-785. Bcl-2 and BLIMP-1 expression predict worse prognosis in gastric diffuse large B cell lymphoma (DLCBL) while other markers for nodal DLBCL are not useful.
P-793. Association of increased ligand cyclophilin A and receptor CD147 with hypoxia, angiogenesis, metastasis and prognosis of tongue squamous cell carcinoma.
P-804. RCL2, a potential formalin substitute for tissue fixation in routine pathological specimens.
P-816. Levels and patterns of expression of hypoxia-inducible factor-1alpha, vascular endothelial growth factor, glucose transporter-1 and CD105 in adenoid cystic carcinomas with high-grade transformation.
P-826. Prognostic significance of Notch signalling molecules and their involvement in the invasiveness of endometrial carcinoma cells.
P-838. The C134W (402 C>G) FOXL2 mutation is absent in ovarian gynandroblastoma: insights into the genesis of an unusual tumour.
P-843. ALK status in a primary lung tumour and metachronous metastases.
P-846. Keratin expression in colorectal cancer: freak of nature or significant finding?

P-467. Mantle cell lymphoma as a component of composite lymphoma: clinicopathologic parameters and biologic implications.
P-481. A clinical, pathologic, and molecular study of p53 and murine double minute 2 in penile carcinogenesis and its relation to prognosis.
P-489. Ki-67 proliferative index predicts progression-free survival of patients with well-differentiated ileal neuroendocrine tumors.
P-496. Expression of the Ets transcription factor EHF in serous ovarian carcinoma effusions is a marker of poor survival.
P-520. Combination of epithelial-mesenchymal transition and cancer stem cell-like phenotypes has independent prognostic value in gastric cancer.
P-529. Heat shock protein 90 is a putative therapeutic target in patients with recurrent advanced-stage ovarian carcinoma with serous effusions.
P-536. Characteristic tubulointerstitial nephritis in IgG4-related disease.
P-557. The spectrum of Merkel cell polyomavirus expression in Merkel cell carcinoma, in a variety of cutaneous neoplasms, and in neuroendocrine carcinomas from different anatomical sites.
P-567. The integration of pathology into the clinical years of undergraduate medical education: a survey and review of the literature.
P-577. Nuclear factor erythroid-derived 2-like 2 (Nrf2) and DJ1 are prognostic factors in lung cancer.
P-585. Loss of expression of the SWI/SNF chromatin remodeling subunit BRG1/SMARCA4 is frequently observed in intraductal papillary mucinous neoplasms of the pancreas.
P-597. Genital rhabdomyoma of the urethra in an infant girl.
P-601. Colonic ganglioneuromatous polyposis and metastatic adenocarcinoma in the setting of Cowden syndrome: a case report and literature review.
P-605. Therapy-related acute leukemia with mixed phenotype and t(9;22)(q32;q11.2): a case report and review of the literature.
P-610. Histologic abnormalities of placental tissues in Fabry disease: a case report and review of the literature.
P-615. The "farmer" pathologist: a midsummer night's dream.

P-182. Fallopian tube as main source for ovarian and pelvic (non-endometrial) serous carcinomas.
P-187. Comparing of IRS and Her2 as immunohistochemical scoring schemes in gastroenteropancreatic neuroendocrine tumors.
P-203. Malignant tumors of the small intestine: A histopathologic study of 41 cases among 1,312 consecutive specimens of small intestine.
P-210. APhL antibody ELISA as an alternative to anticardiolipin test for the diagnosis of antiphospholipid syndrome.

P-216. Morphoproteomic confirmation of an activated nuclear factor-κBp65 pathway in follicular thyroid carcinoma.

P-224. Utility of peripheral blood flow cytometry in differentiating low grade versus high grade myelodysplastic syndromes (MDS) and in the evaluation of cytopenias.

P-231. The histopathological spectrum of human meningiomas.

P-243. Left-sided gastroschisis with placenta findings: case report and literature review.

P-247. HIF-1α, VEGF and WT-1 are protagonists in bilateral primary angiosarcoma of breast: a case report and review of literature.

P-254. Pigmented adenoid cystic carcinoma of the ear skin arising from the epidermis: a case report with immunohistochemical studies.

P-264. Primary small cell carcinoma of the maxillary sinus: a case report with immunohistochemical and molecular genetic study involving KIT and PDGFRA.

P-270. 99mTc-RBC Scintigraphy for diagnosis of intestinal stromal tumor hemorrhage: a case report.

P-274. Ovarian cystic tumor composed of Brenner tumor and struma ovari.

There is no April issue.
